Applicants attorney has called to discuss the restriction requirement (mailed on 7/15/02) made in this application.

Applicants attorney has informed that the pending claim 27 would be canceled, and like to concentrate on claim 28.

Applicants attorney has discussed that antibody which bind to 'Protein-protein binding motif' and 'kinase consensous motif' which are structurally similar and have one phosphorylated amino acid. Applicants attorney has also informed that the Art which reads on the 'antibody that binds to kinase consensous motif' would read on or obvious over the 'antibodies binding protein-protein binding motif.' Applicants attorney was also informed that the species election of Akt consensous' would be maintained, even though the protein-protein binding motif is examined along with the kinase consensous. Examiner has agreed to consider applicants amendments and arguments regarding the restriction of 'antibodies binding to kinase consensous' and 'antibodies binding to protein-protein motif' upon filing.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)
